

Driller's Dustbowl PRO

Part# 48020

NOW AVAILABLE WITH A VACUUM PORT FOR THOSE SUPER DUSTY JOBS.

FEATURES

- The same great Dust Bowl now with a vacuum port for those super dusty jobs
- No more mess
- Works easily with your hole saw

OPERATING INSTRUCTIONS

1. Insert hole saw arbor through the hole at the bottom of the Bowl before attaching to the drill chuck.
2. Insert the arbor in the drill chuck and tighten as normal.
3. Set the hole saw pilot bit to the area you wish to drill your hole. Hold the Bowl's rim to the surface of the material you are cutting.
4. The Bowl's rim and its 3/4" flange will form a seal on the surface of the material you are cutting and the Bowl will trap the debris.

5. As you drill the hole, the Bowl will flex with little resistance. Once the drilling process is complete, the Bowl will bounce back to its original shape, and if kept upright will hold the debris until disposed of.

6. Always wear eye protection, and follow all manufacturers' instructions for the safe and proper use of power tools.

NO MORE MESS

EASY DISPOSAL OF DEBRIS

WORKS WITH HOLE SAW UP TO 8" AND DRILL BITS TOO!
