

PART # 40950

# The PUCK

## Ground Clamp Socket

### A NEW SOLUTION FOR INSTALLING GROUND CLAMPS

Grounding clamps are used to ensure complete discharge of electricity while servicing or maintenance of electrical power systems in substations. There are many varieties of clamps manufactured by different companies, each with different fastening configurations such as an eye-bolt or a T-handle.

Ground clamps often need to be installed in difficult to access areas, leaving workers with poor choices of tools to tighten the clamps. The PUCK, when used with a 1/2" drive socket wrench, provides the proper leverage in limited visibility or access areas, ensuring a proper contact on the bus.

An "indicating line" for use when working blind.

The Puck fits most brands' T-handles.

The Puck also fits most brands' eye-bolts.

or Your Local Electrical  
Supplier

### Features:

- Compact
- Made from aircraft aluminum
- Indicating line
- Multi-purpose
- Industry-standard ground clamps
- Fits common 1/2 inch drive socket wrenches

### Benefits:

- Allows ground clamps to be quickly, easily, and more securely installed in hard-to-get-to places versus the screwdrivers or channel-lock pliers that are currently used
- Lightweight and durable
- Allows the user to see where they need to line up
- One tool can be used with multiple manufacturers' equipment, multiple types (eyes and Ts) and multiple sizes
- Works with existing industry-standard equipment that will be in use for generations to come
- Provides proper leverage on short T-handles

## FEATURES & BENEFITS

## GROUND CLAMP SOCKET: THE PUCK

### FEATURES

**FEATURES:** Compact Size

**FEATURE:** Made from aircraft aluminum

**FEATURE:** Green "Indicating Line"

**FEATURE:** Multi-purpose

**FEATURE:** Works with existing industry-standard ground clamps

**FEATURE:** Fits common 1/2 inch drive socket wrenches

### BENEFITS

**BENEFIT:** Allows ground clamps to be quickly, easily, and more securely installed in hard-to-get-to places versus the screwdrivers or channel-lock pliers that are currently used

**BENEFIT:** Lightweight and durable

**BENEFIT:** Allows the user to see where they need to line up

**BENEFIT:** One tool can be used with multiple manufacturer's equipment, multiple types (eyes and Ts), and multiple sizes

**BENEFIT:** Works with existing industry-standard equipment that will be in use for generations to come

**BENEFIT:** Provides proper leverage on short T-handles
