

THE LAST PILOT BIT YOU WILL OWN!

Revbit gives you the ability to create a pilot hole while keeping your hole saw attached to your drill. Speeding up the time it takes to drill a hole with the standard pilot bit.

Revbit also gives you full control of the hand drill during the entire hole drilling process, resulting in an easier and safer drilling method.

- High Speed Steel is coated with Black Oxide, which increases the tool's lubricity and lifespan.
- The Revit method is ideal for Sheet Metal, Wood, Sheetrock, Plastic.... any material a standard hole saw is used on.
- Preserves holesaw teeth and pilot bits.
- Eliminates jerking torque absorbed on your wrists when holesaw teeth impact and grab the surface.
- The Revbit will fit all standard hole saws.
- Made in USA.
- Get up to 10X the life from your hole saw.
- Approx. the same cost as traditional hole saw pilot bit, 100% better.
- Perfect for Electricians, Plumbers, Sheet Metal Workers, Carpenters...

Specs.

Left Hand/ Reverse Twist Pilot Bit
1/4" (6.35mm)
135 deg. Split point
100% High Speed Steel
MADE IN USA
