

# Instructions:

Pull your rope into the conduit and attach the wires at the end from which the wires are to be pulled. Attach the **ROPEMATIC** to the end of the rope to which you are pulling the wire. This can be done by holding the rope with one hand and pulling it to assure tension. Hold the **ROPEMATIC** to the rope with the open slot and simply slip the **ROPEMATIC** over the rope in a forward motion, away from yourself. This will automatically rotate the rotating cam inside the pulling hub. Hold the rope with one hand just behind the **ROPEMATIC** and slide the **ROPEMATIC** forward along the rope toward the pulling point. You are now ready to pull your wire. Try to create a rhythm between yourself and the person feeding the wire at the other end. The **ROPEMATIC** will lock down to the rope as you pull and create tension. It will release upon sliding it forward with one hand and pulling the slack of the rope with the other hand. Repeat this process until your wire exits the conduit. We do not recommend inserting the wire into the **ROPEMATIC** as it could damage the insulation of the wire.

## Warnings:

Your safety is most important. Please follow the warnings and instructions, they are intended to protect you from injury or death. The **ROPEMATIC** is designed for the use of a single person. It should **NEVER** be used by more than one person. It should **NEVER** be used in energized panels or around energized circuits. The user should be sure that all circuits have been de-energized before using the **ROPEMATIC**. Use common sense. Misuse could result in injury or death. Always make sure that the rope you are using is free from defects to avoid failure. Be responsible and inspect your rope, your work area and the **ROPEMATIC** before each use. **RACK-A-TIERS** assumes **NO** liability and will **NOT** be held responsible for damage, loss, injury or death. By purchasing the **ROPEMATIC** the user/purchaser assumes all responsibility and will **NOT** hold **RACK-A-TIERS** liable. Again, use common sense and work responsibly.

**WARNING:** Always wear approved eye protection.

**WARNING:** **NOT** intended to be used by more than one person.

**DANGER:** **NOT** insulated. Slip-on handles are **NOT** intended for protection against electrical shock.

**DANGER:** **NOT** insulated. Will **NOT** protect against electrical shock.

**ADVERTENCIA:** Utilize **SIEMPRE** protección visual aprobada.

**ADVERTENCIA:** **NO** deben ser utilizados por más de una persona.

**PELIGRO:** Herramienta **SIN** aislamiento. Los mangos cubiertos de plástico **NO** están destinados para la protección contra descargas eléctricas.

**PELIGRO:** Herramienta **SIN** aislamiento. **NO** protégé contra las descargas eléctricas.

**Thank you for your purchase and congratulations on making a wise choice.**
