

The Ferret

NEW PRODUCT

Cable Pulling & Fishing Tool

- Wire fishing and wire pulling tool designed to be more accurate, reliable, and durable than any other fish tape.
- Strong enough to maintain direction and rigidity while fishing wire through walls – yet flexible enough to maneuver past obstacles.

Available in:

4 m (13 feet)

PART #EP04M

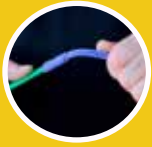

8 m (26 feet)

PART #EP08M

Flexible Tails for Precise Maneuverability

Unique Guide Wheel

The tails made of high-performance polymer for **flex fatigue resistance**, **reflective memory**, and **chemical and impact resistance**.

Metal Hook

Includes 1 spring steel hook accessory so you can reach those difficult-to-reach cables.

**Bring it with you to any job—
The Ferret can handle it!**

Ideal for wiring data cables, antenna cables, security systems, and anything else that requires wire fishing and pulling.

**It can take a beating
and will last you for years!**

Made of **fiberglass-reinforced polymer**.

How to Use The Ferret in 4 Simple Steps:

Step 1: Find an existing opening or drill a minimum 20mm diameter hole into the surface to create an entry point.

Step 2: Tie the cable to the tail end of The Ferret and insert the head (wheel end) in the opening.

Step 3: Direct The Ferret using the body and feed it through until it reaches the endpoint.

Step 4: Pull The Ferret through the opening. Then coil it up for the next job.
