Country of Origin	Designed and assembled in Canada using globally sourced materials
Compatible with	Push on type BR, QP, THQL, HOM and CHOM breakers
Mounting Mode	Plug-on
UL 94 Flammability	V-0 at 1.5mm

Product Features

The BusGuard Panel Filler is an innovative solution that provides both protection and convenience. Unlike traditional panel fillers that often detach from the dead front, the BusGuard Filler securely installs onto the bus bar. This ensures enhanced safety by staying in place when the dead front is removed, while still maintaining a clean, professional appearance when the dead front is reattached. It's safety that stays put!

- Two big safety features protects against shock, electrocution and arc flash hazards.
- High flame retardancy.
- Used mainly on single phase panel boards.
- Patent pending.
- To be fitted by a qualified electrician.
- Intertek Listed: UL STD 67 CSA STD C22.2#29
