

FERRET WiFi

VERSATILE CABLE INSPECTION TOOL

Part# 99300

The Ferret is the world's first true wireless rechargeable inspection camera. The Ferret live streams video footage directly to your smartphone. Six Bright White LED's allow you to see into any area that the Ferret will fit in. The Ferret can be threaded on any 1/4-20 Fish Stick giving you increased versatility and mobility.

Features:

- Wirelessly transmit video and pictures to your smart phone
- Waterproof, rechargeable camera
- Can be mounted on most Fish Sticks
- Wireless range up to 40'
- Save images and video directly to your phone

Kit Includes:

- USB Type C battery charge cable
- Camera thread adaptors
- Camera gooseneck
- Short rod/hook/magnet piece
- Instruction manual

Wire Fishing: If your job requires you to fish wire, this is the best tool investment you will ever make. The included hook and magnet attachments are perfect for wire fishing. With the included hook you can navigate right to the wire you want and pull it out. Being able to get eyes inside the wall while you are fishing is a game changer.

Inspection: Regardless of your industry, chances are you've needed to get eyes on something where your head wouldn't fit. The Cable Ferret is small enough to drop in your pocket or a tool pouch, and lets you quickly get eyes where you need them most. Imagine checking connections behind a piece of equipment or looking above a ceiling. The possibilities are endless.

Glow Rod Mountable: Because the Cable Ferret is WiFi, you are not tethered to a grip like conventional inspection cameras. The Cable Ferret comes equipped with adapters so you can connect it to virtually any glow rod.
