Product Features

- Bends EMT sizes 1/2", 3/4", and 1"
- Integrated pipe reamer and pipe straightener
- Common 10°, 22°, 30°, 45°, 60° and 90° angle demarcations
- Attaches to any scissor or boom lift with square or rectangular guardrails using 2 bolts and a securing pin.
- EFFICIENT – Stop wasting time going up and down and constantly exiting the lift platform. Don't bend conduit on the ground when Skybender allows you to complete conduit systems 2x faster by having both the material and bending tool with you on the lift platform.
- WORK SOLO – Save pipe, avoid misunderstandings, and eliminate mistakes from shouting your needs down to colleagues below. Instead measure, bend, check, and install all in one spot right where you need it.
- ALL-IN-ONE – Its integrated features allow you to bend, tweak, and ream pipe. Skybender has everything needed for complete EMT bending in one lift accessory.
- SAFETY – Going in and out of your lift every time you need to bend conduit introduces more chances for accidents. Using a traditional bender in your lift is also dangerous. Skybender solves both of these problems.
- HIGH QUALITY – Made of anodized aluminum and hardened steel, you can rely on this durable tool to stay in perfect condition bend after bend. With few moving parts, it will be as long-lasting as the conduit installations it helps create.
